

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, November 2, 2019 – 0800 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (39 new fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires:***	7
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	0

Nationally, there are 5 large fires being managed under a strategy other than full suppression.

\*\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Southern California Area (PL 3)**

New fires: 19  
 New large incidents: 1  
 Uncontained large fires: 4

\* **Maria**, Ventura County Fire Department. One mile south of Santa Paula, CA. Brush and short grass. Active fire behavior with wind-driven runs, flanking and backing. Numerous structures threatened. Evacuations and road closures in effect.

**Getty**, Los Angeles City Fire Department. One mile south of West Lake Village, CA. Brush and chaparral. Minimal fire behavior. Structures threatened. Area, road and trail closures in effect.

**Hill**, Riverside Unit, Cal Fire. Three miles southeast of Ontario, CA. Brush and tall grass. Minimal fire behavior. Structures threatened. Reduction in acreage due to more accurate mapping.

**46<sup>th</sup>**, Riverside Unit, Cal Fire. Two miles northeast of Riverside, CA. Brush and tall grass. Minimal fire behavior with smoldering.

\*\*\*Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

\*\*\*Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

**Predictive Services Discussion:** The warming trend across the West will continue as the cold airmass continues to moderate. The thermal trough over California will move east toward the Great Basin. This will allow for warming temperatures over the Desert and slight cooling along coast areas. A breezy northwesterly flow will continue along the Continental Divide and across the Great Plains. Light snow will be possible across the Great Lakes as a weak cold front moves east across southern Canada. Wind across the East, especially the Middle Atlantic States, will become quite breezy as a cold front approaches. Some shower activity will be possible across southern Florida as a cold front stalls over the state and weakens.

## Hazard Tree Felling – Hang-Ups

*Felling Safety Category*

Felling a hung-up hazard tree is a particularly hazardous and complex task. Safely felling a hang-up requires extreme caution and expertise. The following are some topics sawyers should review during tailgate safety discussions to address felling hang-up hazard trees:

### Size up and Evaluation:

- Cut/No Cut (walk-a-way). Is tree secure and does it need to come down?
- What type of hang up? In a fork, pinched between two trees or resting on limbs?
- Vertical hang ups have increased complexities.
- Condition of all relevant trees; live, dead, rot, etc. Does the hang up tree have any weak areas that could fail?
- Obscured view of top?
- If sawyer is unsure of outcome do not attempt to cut leaner.

### Operational Considerations:

- Escape routes for unforeseen circumstances?
- Consider falling trees as a group.
- Consider face cuts versus slash cuts for directional control.
- Rope Technique allows increased distance from danger zones

### Alternative Mitigations:

- Blasting
- Heavy equipment/cable
- No Work Zones

Discuss any personal lessons learned with hang-up trees that you may have experienced.
